Heat Pump Rebate

**Save with Energy
Efficient Heat Pumps**

REBATE GUIDELINES

Rebate is for a heat pump installation on a **newly constructed home**, replacement on an existing home *does not qualify*.

Heat pump must have an efficiency level of **15 SEER or greater** to qualify.

Ensure that your home meets the following thermal standards:

- Double or single pane windows with storms.
- Storm doors or insulated metal doors.
- Attic ventilation that meets building code requirements.
- Insulation with the following R-values:
 - Attic: R-38
 - Wall: R-15
 - Floor: R-19
- Duct insulated in unconditioned area.

***A \$200 rebate per primary residence is available. All guarantees on the quality and performance of the heat pump come from the manufacturer. Purchasing and selecting a dealer to install and provide future servicing is also the responsibility of the member.
